Report on Online Lecture on World AIDS Day by Ms. Madhu Bala

Theme: "Take the Right Path: Advancing Equity in HIV Care"

Date: 1st December 2024

Venue: Online (via Google Meet)

Time: 2:00-3:00PM

Organized by: [Gautam College of Pharmacy, Hamirpur (H.P.)]

Introduction:

On the occasion of World AIDS Day, an online lecture was held featuring Ms. Madhu Bala, an Associate Professor of Pharmacy Practice. The lecture was organized with the aim of deepening understanding and knowledge about HIV/AIDS as well as everyone's rights to equal quality healthcare services in the fight against HIV/AIDS. "Advancing Equity in HIV Care," emphasizes the importance of ensuring that all individuals, regardless of their background, have access to comprehensive and equitable HIV prevention, treatment, and care services. The event witnessed participation from students, faculty members.

Inaugural Session:

Lecture began at 2:00PM with welcome speech by Mrs. Kumari Varsha, followed by a brief introduction to World AIDS Day and its theme. Secretary Dr. Rajneesh Gautam, Prof. (Dr.) Sanjay Kumar (Director cum Principal, GCOP) were also joined this online session.

Lecture by Ms. Madhu Bala:

Key Highlights:

1. Equity in Access to Care:

Ensuring equitable access to HIV care is essential for achieving better health outcomes. This includes talking social elements of health such as income, education, and geographic location.

Health systems must be designed to meet the needs of all populations, particularly those most affected by HIV.

2. Stigma and Discrimination:

Stigma surrounding HIV/AIDS continues to hinder individuals from seeking testing and treatment. Public awareness campaigns are crucial for changing perceptions and reducing discrimination.

Support systems should be established to empower individuals living with HIV and provide them with the resources they need.

3. Community Engagement:

Engaging communities in the design and implementation of HIV services fosters trust and ensures that programs are culturally relevant and accessible.

Peer support networks can play a vital role in helping individuals direct healthcare systems and adhere to treatment regimens.

4. Innovative Approaches:

The integration of technology in healthcare delivery can enhance access to HIV services.

Telehealth, mobile clinics, and online consultations can bridge gaps for individuals in remote or underserved areas.

Continued research and innovation are necessary to develop new strategies for prevention and treatment that address the unique needs of diverse populations.

5. Global Solidarity:

The fight against HIV/AIDS requires a united global response. Countries must collaborate to share resources, knowledge, and best practices to combat the epidemic effectively.

International organizations, governments, and civil society must work together to ensure that funding is allocated equitably to support HIV programs worldwide.

Conclusion

As we observe World AIDS Day 2023, it is imperative to reaffirm our commitment to advancing equity in HIV care. By taking the right path—one that prioritizes inclusivity, community engagement, and innovative solutions—we can ensure that everyone has access to the care they need. Together, we can work towards a future where HIV is no longer a barrier to health and well-being for anyone.

Key Takeaways:

Advocate for policies that promote equitable access to healthcare for all individuals affected by HIV.

Support local organizations working on the frontlines of HIV prevention and care.

Educate yourself and others about the realities of living with HIV to help reduce stigma and promote understanding.

On this World AIDS Day, let us unite in our efforts to advance equity in HIV care and strive towards a world free of AIDS-related stigma and discrimination.
