Subject - Permission for organizing a World Hepatis day on 28 July 2024 Campus.

Respected Sir,

I am writing to inform you about an upcoming event that we are planning to organize at Gautam College of Pharmacy on World Hepatitis Day

The details of the event are as follows:

Date: 28 July 2024

Time: 2:00 - 3:00 PM

Venue: Gautam College of Pharmacy Hamirpur

Organized by: Gautam College of Pharmacy Hamirpur

Eminent Speaker: - Dr Anoop Kumar

I am writing to formally request permission to organize and conduct activities in observance of World Hepatitis Day 2024, which will take place on July 28th, 2024. Our initiative aims to raise awareness about hepatitis, its prevention, and the importance of early detection and treatment.

Thank you for your attention and support.

Yours sincerely,

Rakesh Kumar

Lecturer

I request this event with
this to director sir, for final approval.

REPORT ON WORLD HEPATITIS DAY 2024

Organised By: Gautam College of Pharmacy, Hamirpur

Supported By: IQAC (Internal Quality Assurance Cell)

Introduction: Gautam College of pharmacy, Hamirpur Organised an online guest lecture on World Hepatitis Day 28 July 2024

Hepatitis, an inflammation of the liver often caused by viral infections, remains a global health challenge. While antiviral therapies have advanced, the search for effective treatments continues. Drug repurposing—finding new uses for existing medications—offers a promising approach to enhance hepatitis management. This report reviews recent developments in repurposing drugs for hepatitis treatment, focusing on their efficacy, mechanisms, and potential benefits.

Event overview

The event featured an insightful lecture delivered by Dr. Anoop Kumar (Assistant Professor Department of Pharmacology at Delhi Institute of Pharmaceutical Education and Research)

The online Session Aimed to educate student and Faculty members about the Hepatitis and their treatment. The guest lecture was attended by 175 Individual, including Student, Faculty and staff member

Objective The objective of a guest lecture on World Hepatitis Day is to inform and engage the audience about hepatitis, emphasizing its prevention, detection, and treatment. The aim is to enhance understanding, encourage proactive health measures, and support global and local efforts to combat hepatitis.

Activity Undertaken

Inaugural Session: The Event commenced with a Welcome address by the Mrs. Poonam Talwan (Associate professor) Gautam college of Pharmacy, who gives the brief Introduction to the event

Expert Lecture: Dr Anoop Kumar Delivered a guest lecture on Repurposing of Drug against Hepatitis: the key points discussed are:-

1. Introduction to Hepatitis

- a. Hepatitis is a major global health concern, primarily caused by hepatitis viruses (Hepatitis A, B, C, D, and E).
- b. Chronic hepatitis can lead to severe complications, including liver cirrhosis and hepatocellular carcinoma.

2. Drug Repurposing Concept:

- a. Repurposing involves taking drugs that are already approved for one disease and finding new therapeutic uses for them.
- b. This approach can accelerate the availability of treatments by bypassing some stages of drug development.

3. Reasons for Repurposing:

- a. **Reduced Development Time and Costs:** Existing drugs have established safety profiles, which can significantly cut down the time and cost of bringing a new treatment to market.
- b. **Known Pharmacokinetics:** The behaviour of these drugs in the body is well-documented, allowing for more predictable outcomes.
- c. **Potential for New Applications:** Drugs developed for other conditions might have unexpected efficacy against hepatitis.

4. Successful Examples:

- a. **Antiviral Agents:** Some antiviral drugs originally developed for other viral infections have shown promise against hepatitis viruses.
- b. **Anti-Cancer Drugs:** Certain drugs used in cancer treatment have exhibited activity against hepatitis viruses due to their impact on cellular mechanisms that the viruses exploit.
- c. **Immunomodulators:** Drugs aimed at modulating the immune system may enhance the body's ability to fight hepatitis infections.

5. Research and Clinical Trials:

- a. The lecture detailed ongoing research and clinical trials exploring various repurposed drugs.
- b. Notable examples include trials of drugs initially developed for HIV and cancer that are now being tested for their efficacy against Hepatitis

Q & A Session: Following the lecture, an interactive question answer session was held, where participant had the opportunity to engage directly with Dr. Anoop Kumar

The screenshot displays a Zoom meeting interface with three slides visible on the left and participant thumbnails on the right.

Slide 1: A flowchart titled "Drug Repurposing" showing the process from "Drug Discovery" to "Drug Repurposing". It includes a table with columns: Drug, Disease, Mechanism, and Status. The table lists several drugs and their repurposing status.

Slide 2: A screenshot of a research paper titled "A systematic review of drug repurposing: A review of the literature". It includes a table with columns: Drug, Disease, Mechanism, and Status.

Slide 3: A slide titled "Molecular dynamic studies" listing several steps in the process of drug repurposing:

- Simulation for studying the physical interactions of atoms and molecules
- Force field (Newton's second law)
- Thermostat
- Step 1: Preparation of molecules
- Step 2: Define the box
- Step 3: Simulation (Molecular Dynamics, MD, etc., Explicit, SP, TFE, etc.)
- Step 4: Simulation, visualization and minimization
- Step 5: Publication (NVT, NPT)
- Step 6: Production and simulation
- Step 7: Analysis (RMSD, RMSF, radius of gyration, etc., PCA, etc.)
- Results: Finally available

Participant Thumbnails: The right side of the screen shows a grid of participant thumbnails. The names visible are: anoop, poonam, You, Aarush, 91 others, anoop, poonam, You, 86 others, anoop, poonam, You, Fatima, 87 others.
